

Julia

Julia and her friends are making out
She's in control of your heartbeat
but she insists to dance the night away
Suddenly to fight a feeling
but that will stay untold, anyway

Julia and her friends don't play it loud
She's got a spotlight on her bare feet
She stumps between cups and cigarettes
Moves she's not looked up from the internet
I would not mind if she takes a look at me

Oh Julia, you got to take me far
When I'm around you all my scars fade out tomorrow
You got to take my heart out
I wanna take your love for me
Oh Julia, words just gonna harm
When I'm around you, you just hide away my sorrows.
You just took my heart out
I wanna take your love for -

Hold back a sound
Julia's just got into her favorite track
She turns the beat into her beating chest
Convincing me to try always less
All I can think of is to caress
I want you to take me away like a gentleman
you're pushing my moves which I don't regret
I'm steamed away while lying on the streets now
with you
Julia's just got through

Oh Julia, you got to take me far
When I'm around you all my scars fade out tomorrow
You got to take my heart out
I wanna take your love for me
Oh Julia, words just gonna harm
When I'm around you, you just hide away my sorrows.
You just took my heart out - my heart out
